DETAILED ACTION
REQUEST FOR CONTINUED EXAMINATION

The request filed on June 25, 2004 for a Request for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 10/014678 is acceptable and a RCE has been established. An action on the RCE follows.

Response to Arguments

Applicant's arguments with respect to claims 1, 3, 6-13, 15, 17-26, 28-29 and 31-36 have been considered but are moot in view of the new ground(s) of rejection.

Election/Restrictions

Claims 1 and 15 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 9-10 and 20-21 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3738

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 33-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whitmore (WO 01/091668 A1) in view of Taylor et al. (6,258,098 B1). Whitmore discloses a ureteral stent for placement in a ureter comprising: an elongated body portion defining a lumen, wherein the proximal portion of the elongated body portion is substantially more compressible than the other portions of the elongated body portion; and a retention module disposed proximal to the proximal end of the elongated body portion, however Whitmore fails to disclose the retention module having a fixation element attached by a tether connector. Taylor et al. teaches a fixation element attached by a tether connector to a ureteral stent for non-surgical removal of the stent assembly (col. 1, lines 56-58 and Fig. 2). It would have been obvious to one of ordinary skill in the art to combine the teaching of a fixation element attached by a tether connector to a ureteral stent, as taught by Taylor et al., to a ureteral stent as per Whitmore, for non-surgical removal of the stent assembly.

Allowable Subject Matter

Claims 1, 3, 6-13, 15, 17-26, 28-29 and 31-32 are allowed.

Claims 35-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
